

Johnson Road Park Disc Golf Course Expansion Project

Johnson Road Park has had a 9 hole recreational level disc golf course since 2001.

A local user group of JRP disc golfers in conjunction with the Memphis Disc Golf Club and Germantown Parks & Recreation is ready to perform a major renovation project.

This update was necessitated by the impact of a water infrastructure project currently being built on several of the current holes.

6 of the current holes will remain unchanged. 12 new holes will be added and the course will meander through a significantly larger area of the park. Every hole will have two pin positions (recreational and championship). The hole signs will be updated as well. Please see the attached map for details of the new layout.

The **Memphis Disc Golf Club** is raising a portion of the funds required.

We need your help!
